Software packages				
SolidSteel parametric for NX - Design Package - Framework - Connect	5.490,00 €	1.208,00 €	2.416,00 €	2.416,00 €
SolidSteel parametric for NX - Productivity Package - Framework - Connect - NC Data	7.990,00 €	1.758,00 €	3.516,00 €	3.516,00 €

License notes

For using the software on a workstation a software license is required. If the software should be used simultaneous on several workstations then software licenses are required for all workstations. There is no difference between first and additional licenses.

License model

All of our products are delivered as „floating licenses“, managed by a license server. Inside of the company network these licenses can be used on any number of workstations as long as the permitted number of existing licenses will not be exceeded.

Program protection, license exchange

All licenses of our solutions for NX are managed with passwords for the license server, included in delivery. Replacing the hardware of the license server requires new passwords. The license exchange is made without any additional costs against handing over the old license which should be deactivated..

Updates without change of the main version

Updates inside of a main version, e.g. from version 1.0 to version 1.1 are possible without any license costs. Downloads are available from our web site.

Updates with change of the main version, maintenance

Updates with a change of the main version, e.g. from version 1.0 to 2.0 are only available with an active maintenance contract. A maintenance contract includes the right to use the newest software version (Updates) and additional phone, email and remote support for one year. If there will be no timely cancellation to the end of the time of validity the maintenance will be automatically renewed for more 12 months.

It is necessary to order maintenance together with the software. The later entry for maintenance is only possible with the Return-To-Support (RTS) regulation.

Updates without maintenance, Return-To-Support (RTS)

With the Return-to-Support (RTS) arrangement customers without an active maintenance contract have the possibility to enter subsequently into an maintenance contract. The RTS fee contains the re-entry into a maintenance contract and additionally a maintenance contract for the following year.

Prices

All prices are official sales prices for the European market, based on the current price list. The prices in other regions can be different and should be asked for each individual case or can be found in the regional price lists (if available).

- Applicable taxes and delivery costs are not included in the prices
- All orders are following our terms of delivery and payment
- All data subject to any possible errors
